Tomo Kihara is a media artist that designs and codes "toys for thought"— experimental games and interventions that draw out unexplored questions from people through play. He holds an MSc in interaction design from TU Delft (NL) and has collaborated with organizations like Waag Futurelab and Mozilla Foundation on various projects. His recent projects have been nominated for the Ars Electronica STARTS PRIZE (Linz, 2021) and exhibited at the Victoria & Albert Museum (London, 2022).
